

AvSafety investigation video – Distracted on approach worksheet

Watch: Distracted on approach (civilaviation.au/video)

(1) What were the main factors that led to this incident?
(2) What steps can you take to maintain situational awareness during flight?
(3) The environment can look vastly different between day and night, what factors should you consider when conducting an approach to an aerodrome at night?

(4)	What actions potentially lead to a lack of 'shared mental model' between the pilot and ATC?
(5)	Describe the visual approach criteria by night for VFR or IFR aircraft.
(6)	What actions should you take if a visual approach cannot be achieved?
(7)	What are your key takeaways from this video?
