I, WARREN CRAIG MARTIN, Acting Executive Manager, Regulatory Services & Surveillance, a delegate of CASA, make this instrument under regulations 11.160 and 11.205 of the *Civil Aviation Safety Regulations 1998*.

[Signed C. Martin]
Craig Martin
Acting Executive Manager, Regulatory Services & Surveillance
20 February 2019

**CASA EX21/19 — Standard Take-off and Landing Minima (Cebu Air, Inc) Exemption 2019**

1 **Name**
This instrument is *CASA EX21/19 — Standard Take-off and Landing Minima (Cebu Air, Inc) Exemption 2019*.

2 **Duration**
This instrument:
   (a) commences on 1 March 2019; and
   (b) is repealed at the end of 28 February 2022.

3 **Definitions**
   *Note* In this instrument, certain terms and expressions have the same meaning as they have in the Act and the Regulations. These include: aerodrome, air traffic control, low-visibility approach, low-visibility operation, low-visibility take-off, pilot in command and runway visual range.

   In this instrument:
   
   **ATC** means air traffic control.
   
   **CAT** means category, and refers to the various categories of precision approach operations mentioned in this instrument.
   
   **DH** means decision height.
   
   **LVO** means low-visibility operation.
   
   **LVP** means low-visibility procedures applied by ATC at an aerodrome for protecting aircraft operations during conditions of reduced visibility or low cloud.
   
   **M/M** means the particular make and model of an aircraft.
   
   **RVR** means runway visual range.
4 Application
This instrument applies in relation to Cebu Pacific Air of Philippines (the **exempted operator**), ARN 819812, if:

(a) the exempted operator conducts a flight to or from an aerodrome in the following kind of aircraft (the *aircraft*): A330-300; and
(b) ATC at the aerodrome has informed the pilot in command of the aircraft that LVP are in force.

5 Exemptions
(1) The exempted operator is exempt from compliance with subregulations 257 (3) and (4) of CAR in relation to the flight.
(2) The pilot in command of the aircraft is exempt from compliance with subregulations 257 (3) and (4) of CAR in relation to the flight.

6 Conditions
(1) It is a condition of the exemption in subsection 5 (1) that the exempted operator ensures compliance with the requirements mentioned in subsection (3).
(2) It is a condition of the exemption in subsection 5 (2) that the pilot in command of the aircraft ensures compliance with the requirements mentioned in subsection (3).
(3) The requirements are:
   (a) the aircraft must comply with the meteorological minima for LVO and associated requirements set out in Schedule 1; and
   (b) the requirements for LVO mentioned in Schedule 2.

Schedule 1 Operating minima for LVO

**Low-visibility take-off minimum**

1 An aircraft of a kind mentioned in column 1 of Table 1 must not conduct a low-visibility take-off from the aerodrome if the reported RVR for the take-off is less than the meteorological minimum mentioned in column 2 of the Table.

<table>

<td>A330-300</td>
<td>125 m</td>
</tr>
</tbody>
</table>

**Low-visibility approach minima**

2 An aircraft of a kind mentioned in column 1 of Table 2, when conducting a low-visibility approach operation mentioned in column 2 of the Table for the purpose of landing the aircraft:
   (a) has the RVR meteorological minimum mentioned in column 3 of the Table for the low-visibility approach operation; and
   (b) must apply the DH mentioned in column 4 of the Table for the low-visibility approach operation.
Table 2: Approach minima and requirements

<table>
<thead>
<tr>

</table>

Schedule 2  Requirements for LVO

Operating minimum and procedures

1 The requirements for conducting LVO are the most restrictive of the requirements in the following:
   (a) this instrument;
   (b) the LVO authorisation issued to the exempted operator by the Civil Aviation Authority of the Philippines and the terms and conditions for LVO associated with that authorisation.

Approach ban

2 For landings, the following approach ban rules apply:
   (a) when making an approach, the aircraft must not continue beyond 1 000 ft above aerodrome elevation if a controlling zone RVR is reported by ATC as continually less than the specified minimum for the landing;
   (b) if, after passing 1 000 ft above aerodrome elevation, a controlling zone RVR is reported by ATC as falling below the specified minimum, the approach may be continued to the minimum.
