

WHS Policy Statement

CASA is committed to:

- promoting and protecting the physical and mental health and safety of workers
- providing safe and healthy workplaces
- establishing and monitoring management systems that prevent work-related injury and ill health to workers and others who can be affected by CASA activities
- establishing measurable objectives and targets for health and safety to ensure continuous improvement aimed at elimination of work-related illness and injury or safety risks.

CASA strives to:

- continually improve WHS performance and management systems
- comply with legal and other requirements
- achieve WHS objectives.

In relation to the management of health and safety risks CASA undertakes to:

- establish, implement and maintain processes for the elimination of hazards and reduction of WHS risks using the hierarchy of controls set out in the WHS Act
- implement risk management processes that consider the nature of CASA's workplaces and work activities and the scale of WHS risks
- consult, co-operate and co-ordinate with other agencies (where applicable) in relation to the management of WHS risks
- engage in ongoing monitoring and auditing of conditions associated with CASA's operations.

In relation to WHS training and information, CASA shall:

- provide to workers appropriate training, information, instruction and supervision
- disseminate WHS information to workers and visitors to the workplace, where applicable.

CASA shall ensure that:

- this policy is implemented effectively
- health and safety implications are considered during the procurement of goods and services and during organisational change
- consultation processes are established and implemented so that workers and HSRs are included in decision-making where there is an impact on WHS
- processes are in place to provide assurance about the WHS management system
- appropriate resources are provided to meet the requirements of this policy and these are reviewed at planned intervals.
